

We, the 1'700-odd Sunrise employees, are the driving force behind the success of the company. By placing people at the center of all we do, we are able to meet the present and future communication needs of each of our 3 million customers.

Our successful team is looking for reinforcement in the following area

Data Warehouse Reporting Specialist

Your Role:

Our BI Team ensures the professional development of the Corporate Data Warehouses at Sunrise. Together with our internal customers we are constantly seeking to improve our DWH and support the introduction of new functionalities onto our platforms. The BI team is responsible for a complex DWH and BI system landscape. In addition to the central Teradata und Legacy Oracle data warehouse systems we are also responsible for Informatica, \$Universe scheduler and numerous ODS/datamarts. The SAP BOXI reporting layer, a commissioning system plus data mining and matching tools complete the BI system landscape.

Your area of responsibility:

- Gather and document the analysis requirements of Business Users (both consumer and business customer focus)
- Design, create, test and maintain reports and universes as needed by the Business
- Maintain and develop the corporate report portal, presentation layer and related processes
- Independent conceptual work and solution proposal in order to fulfill Business requirements.
- Contribution to and management of DWH-projects – from scope though to post rollout support.
- Working together with other DWH and IT-Specialists to deliver solutions to our internal customers.
- 2nd/3rd Level support for the reporting users.
- Ensure internal customer satisfaction.

Your Skills/Our requirements:

If you meet our following expectations, we look forward to receiving your complete application:

- IT/Business/Science Degree in a quantitative area and/or experience in Data warehouse report development and IT.
- Experience in SQL programming and data management.
- Experience with commercial databases(e.g. Oracle, Teradata) and reporting tools (e.g. Business Objects, Crystal Reports)
- Strong conceptual understanding of DWH data models and transformation of business requirements into business value.
- Good understanding of DWH business processes.
- Ability to take the lead in providing solutions within in the DWH area in order to fulfill the business requirements.
- Commitment to the delivery of high quality solutions and willingness to learn new tools.
- Consulting experience (external / inhouse).
- Strong analytical and communication skills.
- Permanent contribution to the improvement and optimization of existing DWH processes.
- Track record of successful DWH Implementation projects.
- Excellent written and spoken English. German is an advantage.
- Ability to work with different teams in a multi-cultural environment.
- Nice to have:
 - Experience of managing large data sets for analytical purposes
 - Experience in Telecommunications, Consumer Goods or Finance

- 2-3 years experience in Data Mining and in the use of Data Mining tools (e.g. SAS Enterprise Miner, SPSS Clementine).

We offer interesting, challenging and varied work in a professional and dynamic environment. A motivated team, a progressive compensation scale and attractive benefits await you.
